# Table 3. User Feedback

### **User Feedback**

MIT open course ware is doing a very good job. It Is because of these videos that I was able to reach centum in mathematics and engineering. Thanks for that. Independent Learner, India

I am eternally grateful for the wealth of knowledge put forth on this site. I was a gifted student in a small high school with no resources for such, and these courses helped me not be bored. Now in my second year of undergrad, I have finished all the Physics courses from the undergrad and graduate sections

### -Student - College/University, USA

Why I donate to OCW: OCW is allowing me to pursue my love of astrophysics in a learning capacity with freedom from fees while still giving me the opportunity to undertake an undergraduate later should I qualify. The teachers are outstanding and I feel only grateful for their help along the way that has to count towards something. Hence, I am only too pleased to part with a few \$. Independent Learner, USA

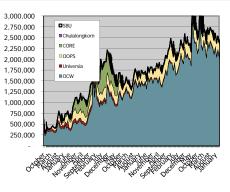

Why I donate to OCW: I donated because I feel that I am lucky to be able to get an education for free here in Sweden. I am born in Afghanistan and know that many people from my country and other countries don't have the possibility to get an education. I hope I can help other people through my donation.

## Independent Learner, Sweden

Hi I just wanted to take a moment and thank M.I.T. for the resources that they have available online with Opencourseware. As someone who is very interested in learning computer science the lectures have helped a lot. I just wanted to say thank you for making such useful resource available to the public.
