

# Lesson plan, Prototypes to Products, week 6, Thursday

## ***Props***

### ***Handouts:***

Fund raising opportunities sheet

The attached list has several opportunities for you to apply for grants for your projects. You should apply for at least one. You could raise some money, and it is also very helpful to have to explain your work and get feedback from people outside your projects. It helps raise awareness and helps make your project more active in the MIT community.

If you are interested, please send me a copy of your application(s) and I would be happy to look it over.

### ***Logistics***

Machine shop class, IDEAS generator tonight

### ***Activities***

Progress reports

Plans for next 2 weeks, description of M1 review and goals

How to write a fundraising proposal

### ***Optional activity***

### ***Homework***

Come up with schedule for next 2 weeks

Look through grants and find one that is appropriate.
