

Problem Wk.5.1.3: Cascade of System Functions

Add the procedure `Cascade` to your file `sfSkeleton.py` as described in the software lab handout. Debug it using `swLab05Work.py` and paste it in here when it works.

Remember that you can use the `+` and `*` operators on Polynomials.

You may also find it helpful to refer to the [documentation for SystemFunction](#). Note that your code should use `SystemFunction(...)`, without any module name prefix.

```
def Cascade(sf1, sf2):  
    pass
```
